PROFESSIONAL SUMMARY

Senior Software Engineer with 15+ years of experience designing and delivering enterprise web applications across front-end and full-stack environments. Proven track record leading large-scale modernization initiatives, including migrations from Vue 2 to Vue 3 and Webpack to Vite, resulting in significant improvements in maintainability and performance. Three years of experience as a Tech Lead, driving engineering best practices, mentoring teams of up to 5 developers, and collaborating with cross-functional stakeholders to deliver high-quality solutions.

Strong background in TypeScript, Vue.js ecosystems, testing strategies, and software architecture principles, including Domain-Driven Design and Design Patterns. Active contributor to the JavaScript community through MDN/Mozilla translations and open-source maintenance, successfully scaling Storyblok's JavaScript SDK adoption from 500K to 6.5M downloads. Currently pursuing an M.S. in Artificial Intelligence while expanding expertise in AI-assisted software development and modern engineering practices.

Recently incorporated AI-assisted development workflows using Claude CLI to accelerate implementation while maintaining responsibility for software architecture, technical decision-making, and the review of AI-generated code.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Node.js, PHP

Front-End: Vue 2/3, Composition API, Vuex, Pinia, React, Redux, AngularJS, Vuetify, Bootstrap

System Design

Architecture: Domain-Driven Design (DDD), Design Patterns, Front-End Architecture, Performance Optimization, Component-Driven Development

Leadership: Technical Leadership, Mentoring, Code Reviews, Engineering Best Practices

Testing: Jest, Vue Test Utils, Playwright, Cypress, NightWatch

Build & DevOps: Vite, Webpack, Git, GitHub Actions, CI/CD Pipelines

Back-End: Node.js, Laravel, REST APIs, MongoDB, MySQL

Data Visualization: D3.js, Power BI

PROFESSIONAL EXPERIENCE

Sanalife (USA) | Senior Front-End Developer

October 2022 – Present

- Led migration initiatives from Vue 2 to Vue 3, reducing technical debt and improving maintainability.
- Refactored front-end architecture using Vue 3 Composition API, enhancing modularity and code reuse.
- Integrated Power BI reporting capabilities into web applications.
- Enhanced build performance and reduced application memory usage by 75%.

Storyblok (Austria) | Senior Front-End Developer / Tech Lead (Contractor)

November 2020 – April 2024

- Managed the Storyblok JavaScript SDK, increasing package adoption from 500K to 6.5M downloads.
- Led migration from JavaScript to TypeScript, improving maintainability and scalability.
- Served as Tech Lead, mentoring a team of 5 developers through code reviews and architectural guidance.
- Developed advanced Undo/Redo functionality for complex state management scenarios.
- Collaborated with international teams to establish engineering standards and best practices.

Empiricus Research | Senior Front-End Developer

May 2018 – September 2021

- Developed enterprise applications using Vue.js and TypeScript.
- Integrated front-end systems with PHP/Laravel microservices and managed API contracts.
- Implemented unit testing with Jest and end-to-end testing using NightWatch and Cypress.
- Designed and implemented enterprise-grade internationalization (i18n) solutions supporting multiple locales for large-scale retail applications.

IBM do Brasil | Web Programmer – Santander Bank Project

November 2016 – May 2018

- Contributed to the migration of legacy AngularJS applications toward React-based solutions.
- Collaborated on database management and PaaS-related initiatives.
- Developed interactive dashboards using D3.js.

Engebras Technology of Information S.A. | Full-Stack Developer

September 2015 – November 2016

- Delivered full-stack solutions using Node.js, MongoDB, AngularJS, and React.
- Implemented monitoring and performance improvements to increase system reliability.

AI & Emerging Technologies:

- AI-Assisted Software Engineering (Claude CLI)
- Agentic Development Workflows
- Large Language Models (Academic)
- Machine Learning (Academic)
- AI-Augmented Code Review and Architecture Governance

ACADEMIC BACKGROUND

Master of Science in Artificial Intelligence (Expected 2028)

University of Colorado Boulder

March 2026 – Present

Relevant Topics: Machine Learning, Large Language Models, AI Systems

Postgraduate Certificate in Software Engineering

PUC-SP

2016 – 2017

Bachelor's Degree in Advertising and Marketing

FMU-SP

1998 – 2001

LANGUAGES

- English: Fluent
- Portuguese: Native

COURSES & CERTIFICATIONS

- Introduction to Machine Learning: Supervised Learning (University of Colorado Boulder)
Completed March 19, 2026
<https://www.coursera.org/account/accomplishments/certificate/9SNU4G88VKE2>
- Certified AngularJS and NodeJS Course (Udemy) – Completed July, 2015
- WD43 Front-End Course by Caelum – Completed July, 2015

CONFERENCES

- ReactConf
- Vue.js Summit
- Angular SP IBM #11
- AWS Summit
- NodeConf BR

SELECTED ACHIEVEMENTS

- Pioneered the adoption of AI-assisted development practices using Claude CLI, establishing a human-in-the-loop approach in which AI accelerated implementation while architectural integrity, maintainability, and code quality remained under engineering oversight.
- Increased open-source package adoption from 500K to 6.5M downloads.
- Reduced front-end memory consumption by 75% through performance optimization initiatives.
- Led multiple successful migrations, including Vue 2 → Vue 3 and Webpack → Vite.
- Implemented enterprise-grade internationalization solutions for large-scale retail applications.
- Active MDN/Mozilla contributor supporting the JavaScript community.
